INAMORI Art  Project Group

# The Firefighters

This drama is set in a church near the WTC and a love story of a firefighter died in the line of duty in rescue operation against terrorism and his bereaved family. Any people from any countries may feel the same sorrow when they lost beloved family. If we stand on such a point, sad incidents like terrorism will never happen. There are still war and terrorism at various places around the world. We need to join hands in hands and respect each other as fellows living on the same Earth over the differences of race, culture and religion, not to fight each other. It's exactly the future of the Earth we need to choose, isn't it? We would like to convey that through this drama.

## IAPG received commendation from the US Congress

On October 13 in 2019, Noriko Inamori, the founder of the IAPG as well as the IAPG received commendation from the United States Congress and New York City respectively for the art activities advocating peace in New York.

## About INAMORI Art Project Group

INAMORI Art Project Group (IAPG) was established by a woman, Noriko Inamori who had a progressive intractable disease. She decided to do the things she can do good for the world while living, and established an amateur art group IAPG. We have five units, Drama, Music, Dance, Japanese Taiko Drums, and Art Picture. And we are doing our activities striving for the peaceful world with no wars. Our standpoint is that we are all Earth Family members living on the same Earth, and all the existence on the Earth are precious over the racial, ethnic and religious differences.

IAPG's latest news can be received on Facebook and in our e-mail magazine. For further information, please access to our website.
